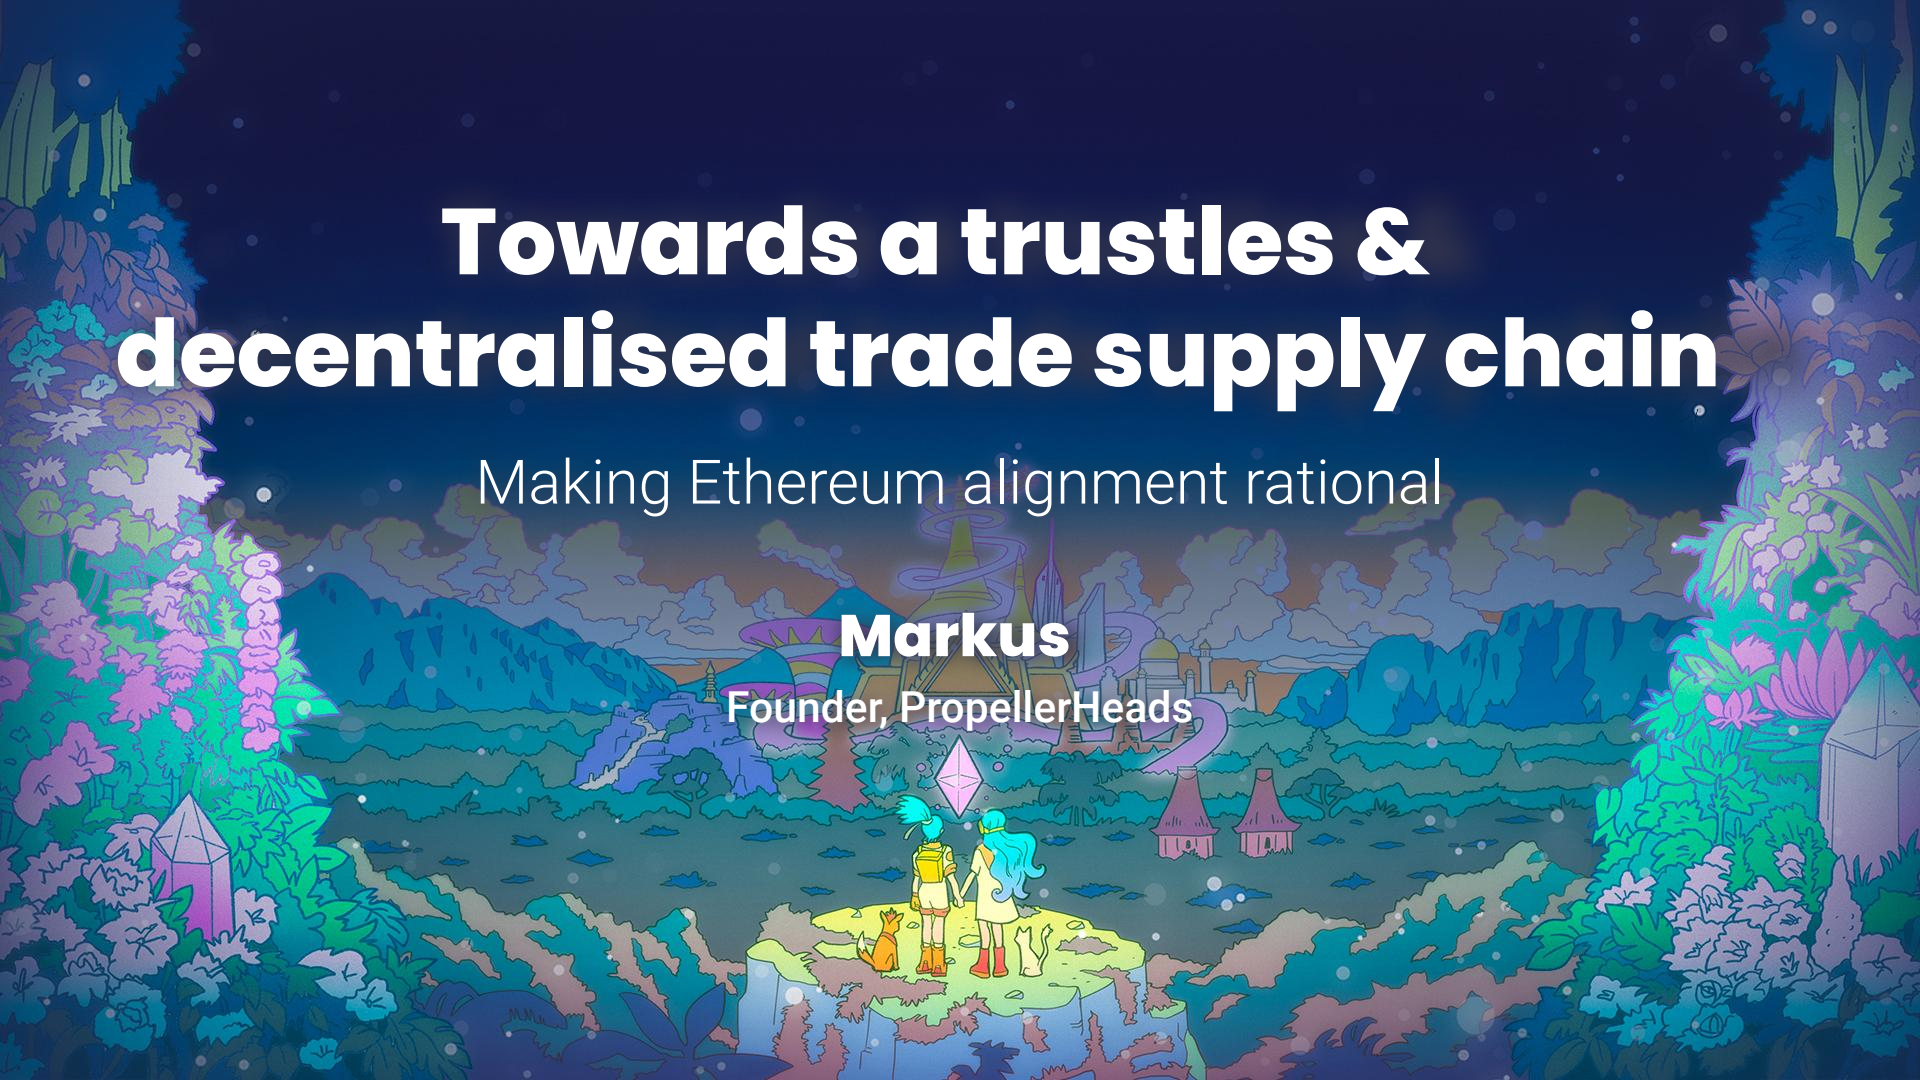
Towards a trustles & decentralised trade supply chain

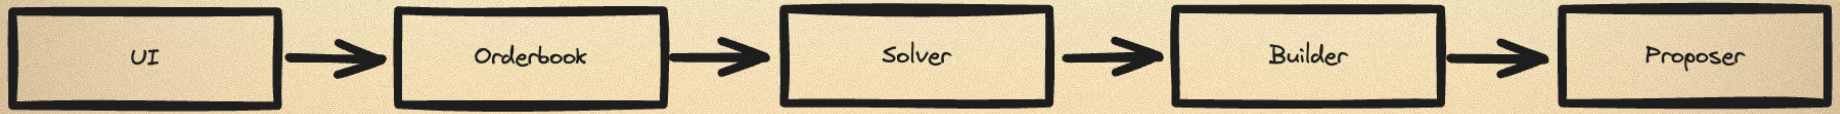
Making Ethereum alignment rational

Markus

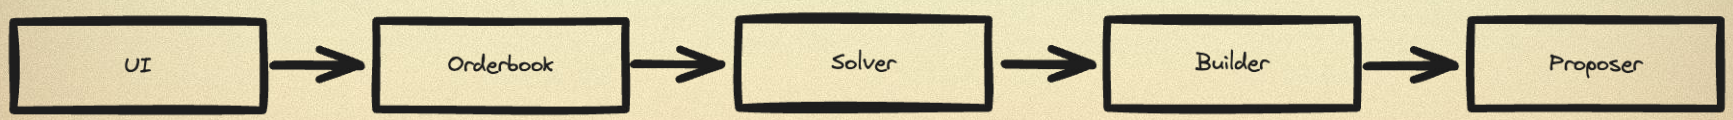
Founder, PropellerHeads



The trade supply chain



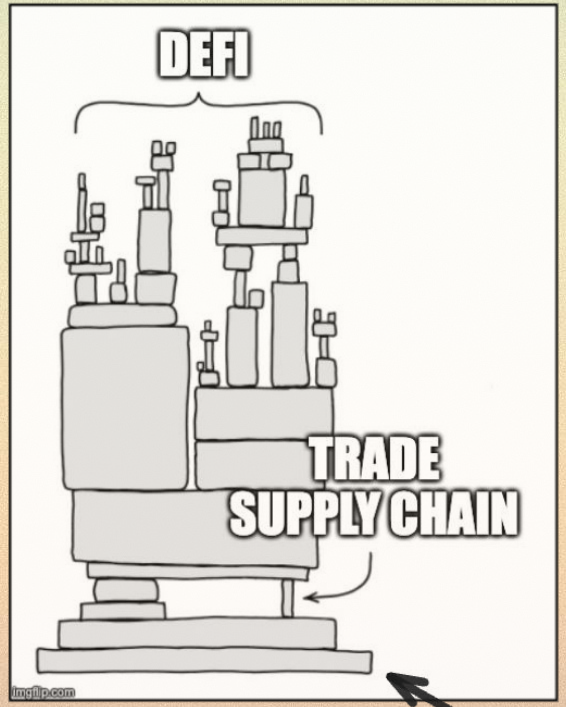
Where we are today



UI	Orderbook	Solver	Builder	Proposer
Trusted	Trusted	Trusted	Trusted	Trustless
Centralising	Centralised	Centralising	Centralising	Decentralised

We depend on the trade supply chain

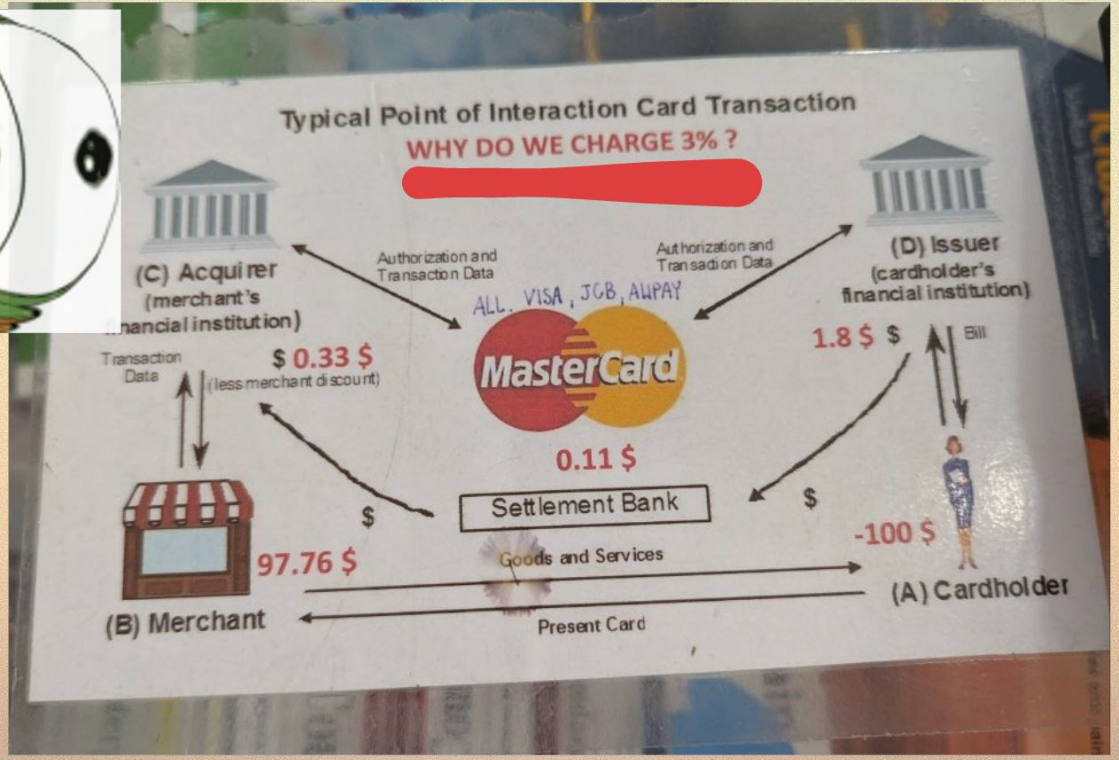
Economy



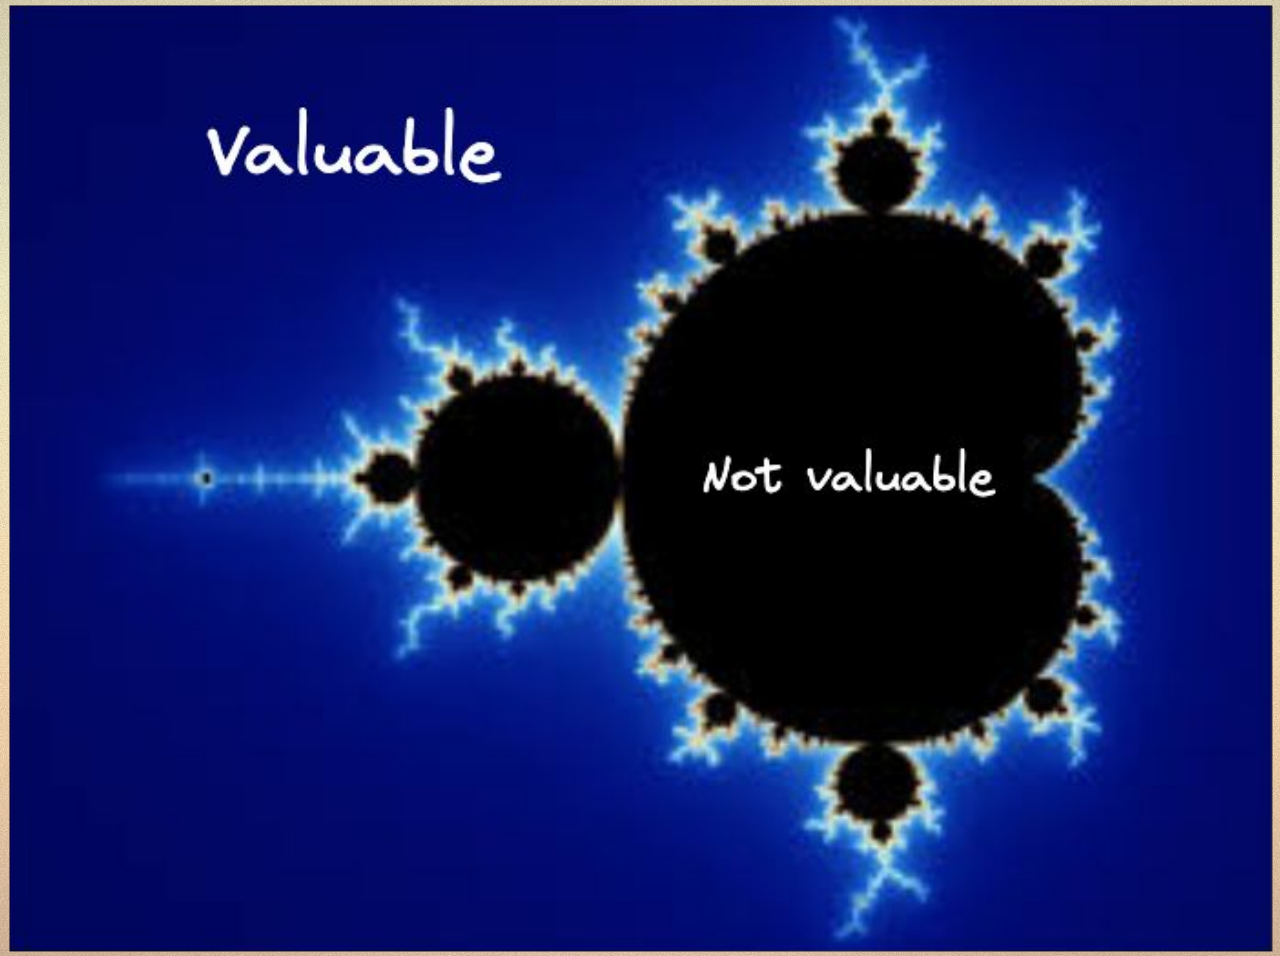
Decentralised Settlement

Trust -> Centralisation -> Monopoly Pricing

-> permissioning -> censorship

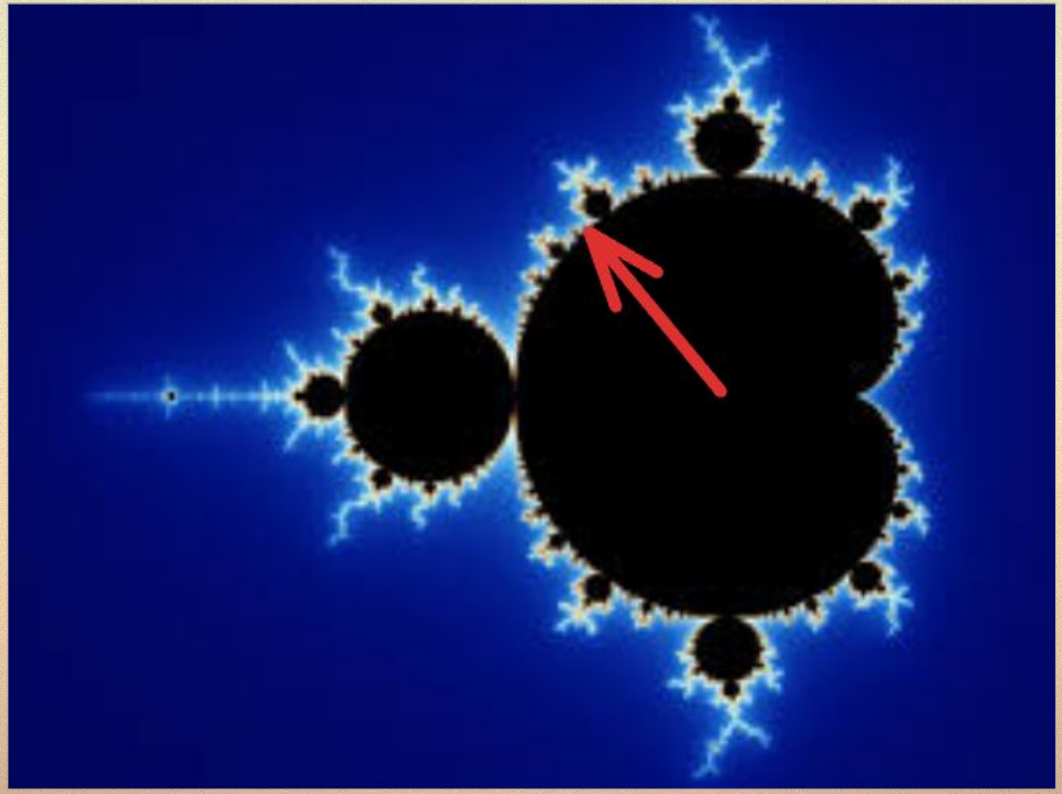


What makes decentralisation possible?

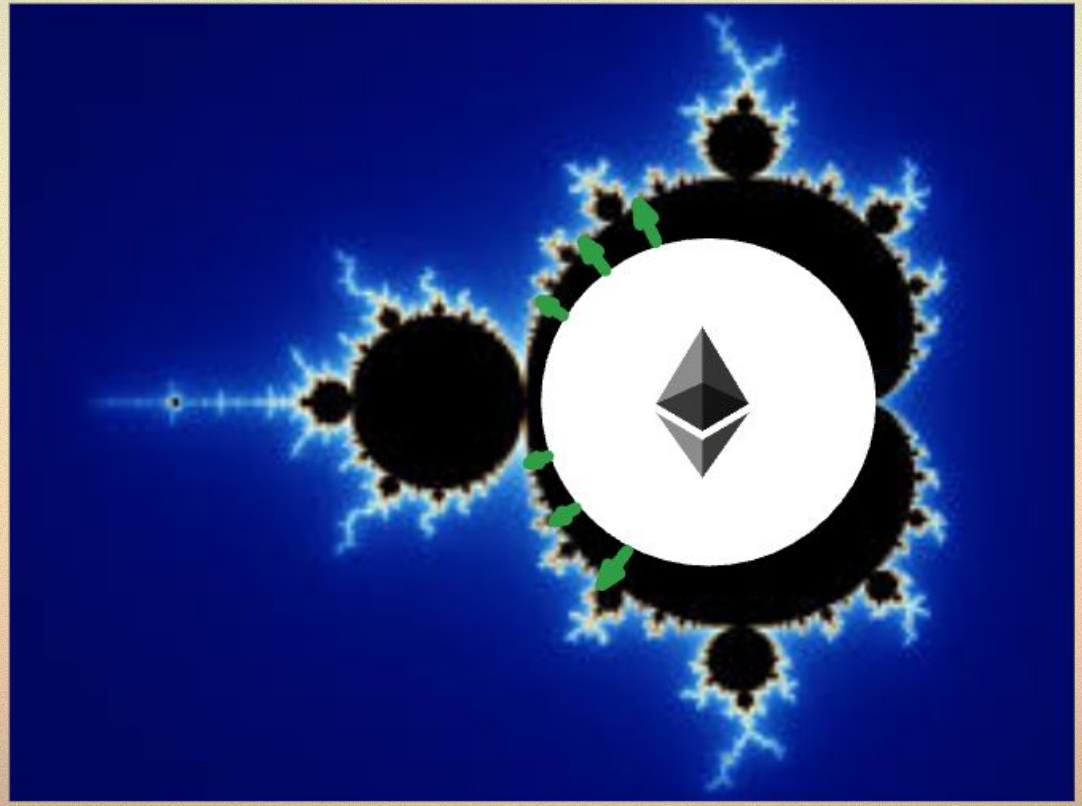


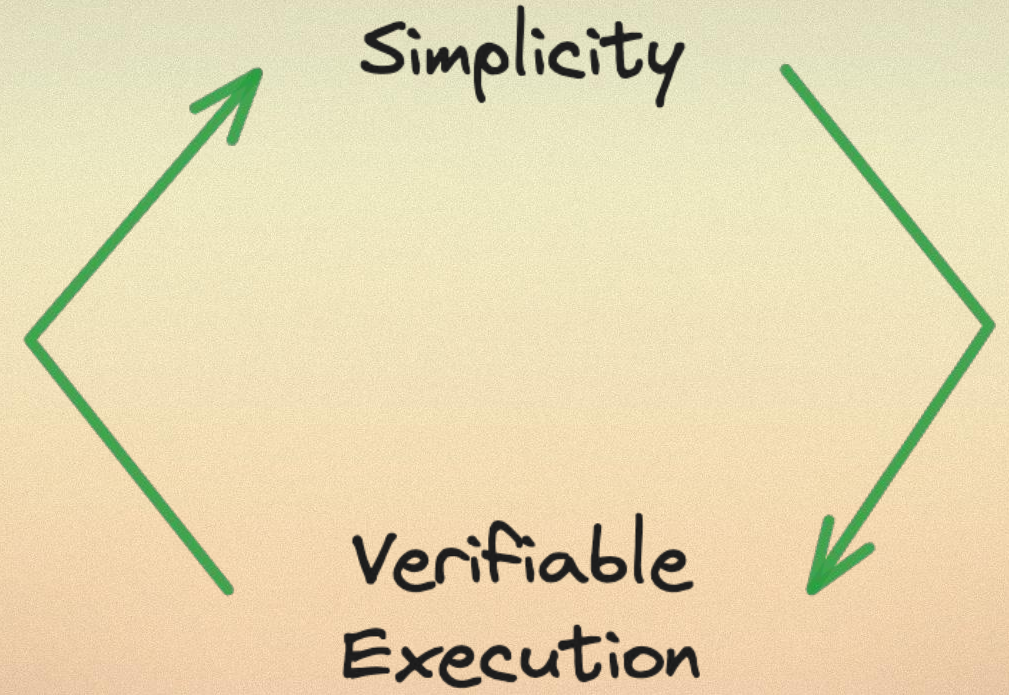
Valuable
Not valuable

Far to the edge --> Centralising



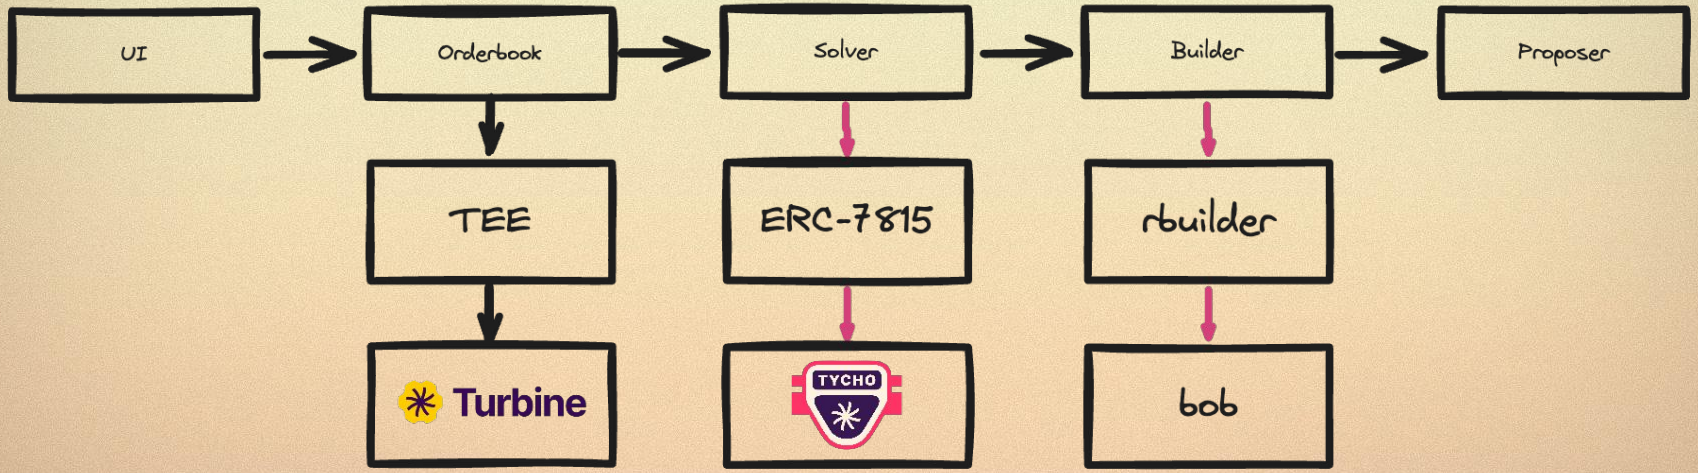
Ethereum lowers the barrier to contribute



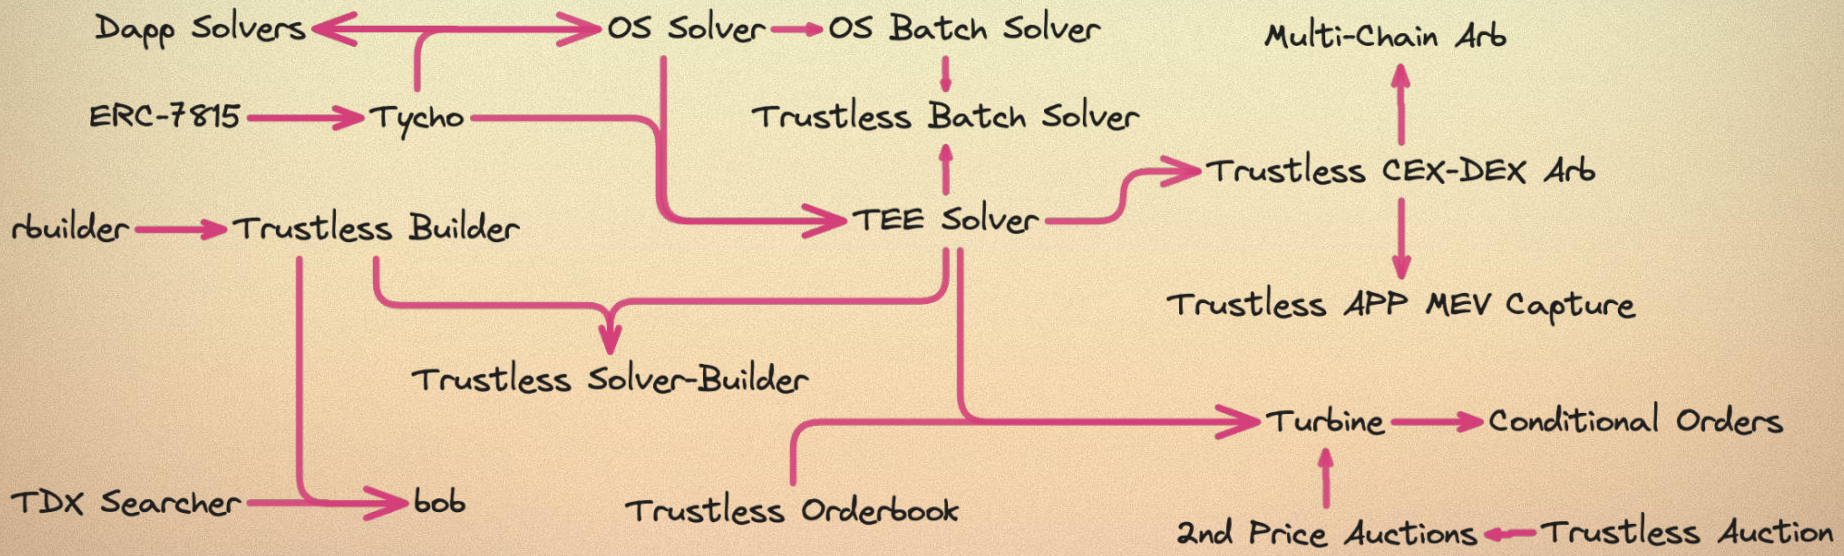


Simplicity
Verifiable
Execution

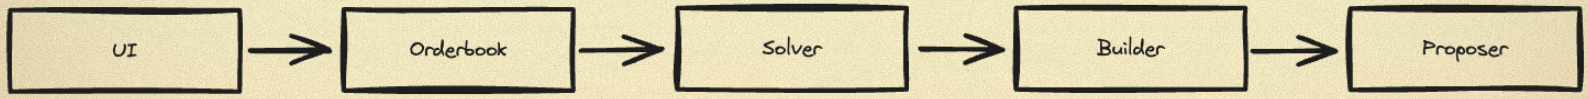
Where we are today



Trustless & Decentralised Skill Tree



Lets build a trustless trade supply chain



Trustless Trustless Trustless Trustless Trustless

Decentralised Decentralised Decentralised Decentralised Decentralised

Open Source, Standards, Verifiable Execution

Thank You!
