

Launching a project (token) from the global majority

Launching a project (token) from the global majority

What makes token go up vs down

Do you have a market maker?

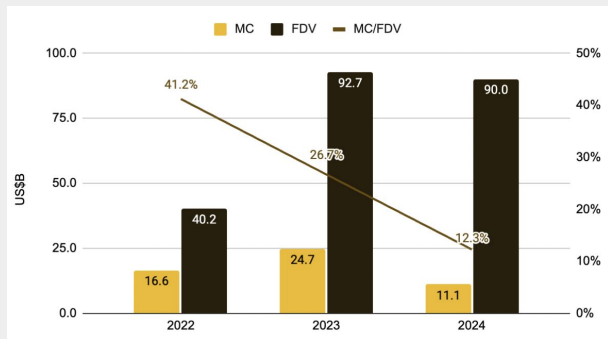

Are you investors going to buy on secondaries?

Fair Launch vs ICO vs Pump.fun

Launching a project (token) from the global majority

QUADRATIC ACCELERATION (Q/ACC):
A MECHANISM FOR PROTOCOL-BONDED
TOKENIZATION

So if we know how these tokens work behind the scenes, how can we empower projects without these big VCs?

- Bring back ICOs! Fair launches!
- Building a meaningful token mechanic that can actually scale.
- Revenue (DAO treasury)
- High float, low FDV
- Longterm token view
- Narrative > all

Launching a project (token) from the global majority
