

# Road to Effective Public Goods Funding

through Quantitative Cross-Comparative  
Analysis of Grants Programs

**Shinya Mori**  
Fracton Research

Section 1

# Introduction of Our Research

# Introduction

- To achieve a better grants program: a more effective and more fair program.
- To discover the difference among various grants program by **a cross-comparative quantitative analysis of different grants programs.**
- To Focus on different types of decision-making bodies.

# Target Grants Programs

## Foundation Type

## QF Type

## Democratic Type

Small group  
accepted by the  
community

Decision making by  
top-down

Lower transparency

Quadratic Funding

Token Voting

Delegates

Council elected by  
the community is  
managing

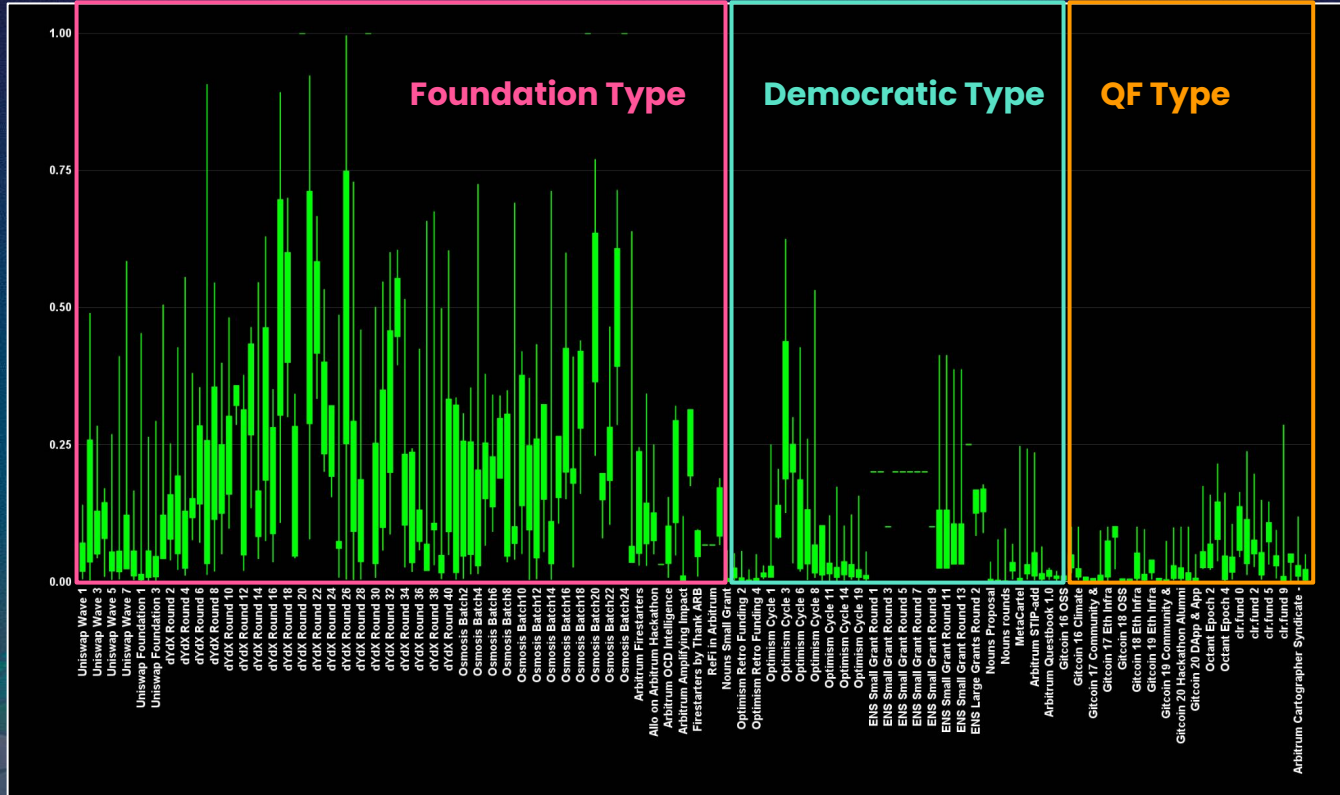

## Section 2

# Results of Research & Analysis

# Analysis Results: Normalized Grant Amount

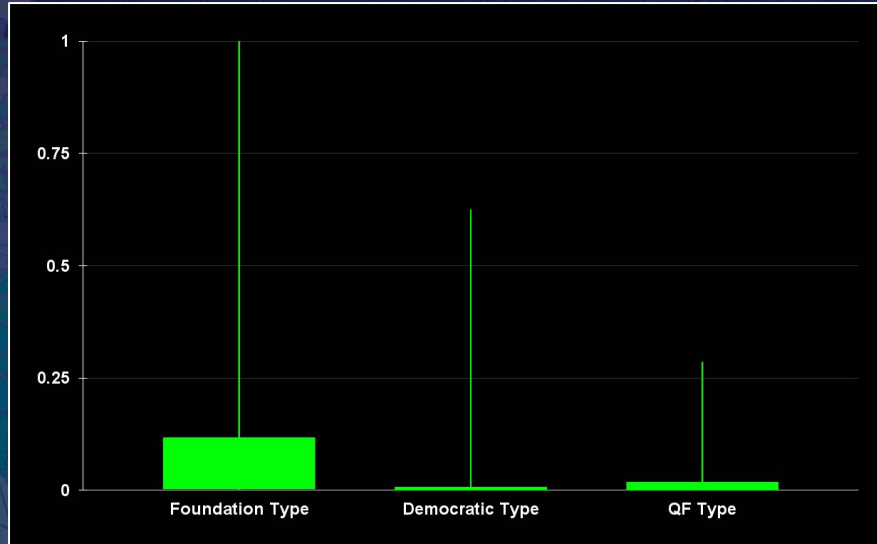

# Analysis Results: Normalized Grant Amount

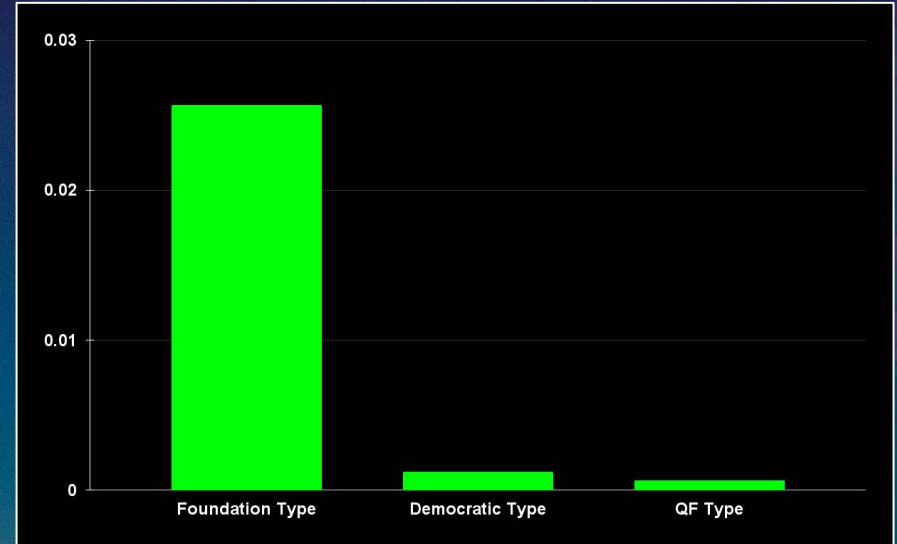

# Analysis Results: Variation (Difference between max and min)

Normalized Grant Amount by Type

Grantees' Variation by Type

# Grant amounts depend on grant operation types

Type	Foundation Type	Democratic Type	QF Type
Programs	Uniswap, dYdX, Osmosis	Optimism, Arbitrum, ENS, Nouns, Public Nouns, MetaCartel	Gitcoin, clr.fund, Octant
Grant Amounts	Larger	Smaller	Smaller
Variation	Larger	Smaller	Smaller
The Number	Smaller	Larger	Larger

**Bias by Foundation is “Good”**

**Bias Improves Democratic Approach**

**Plural Biases are “Better”**

**“Reason serves as a universal tool for the fabrication of all other tools, rigidly purpose-directed and as calamitous as the precisely calculated operations of material production, the results of which for human beings escape all calculation.”**

**— *Max Horkheimer & Theodor Adorno, Dialectic of enlightenment, 1947***

# Effective Public Goods Funding
