

The Next Generation of Decentralized Governance

@tracheopteryx • 12 Nov 2024

Why is decentralized governance important?

It's how we'll share resources without killing each other

A large, light-colored dog with brown patches is lying down on a patterned blanket. A small, grey and white striped kitten is nestled against the dog's chest. A small, light-colored puppy is also visible, lying near the dog's front paws. The scene is peaceful and intimate, suggesting a close bond between the animals.
