# Gas Cost Schedule

OPCODE	Name	Gas Cost
01	ADD	3
02	MUL	5
09	MULMOD	8
0A	EXP	static: 10 dynamic: 50 * exponent size
60 - 7F	PUSHx	3
52	MSTORE	static: 3 dynamic: 3 * expanded memory
precompile 0x01	EcRecover	3000

## Motivation

- Gas cost schedule updated to match real execution costs
- Promote client diversity
- Network security and vector of attack
- Decentralization and balanced network
- Smart contract code quality and optimizations

## Goals

- Effective measurement methodology
- Reproducible results
- Automated tooling
- Updated Gas Cost Schedule

Part 1

# Research

# Series of Test Programs

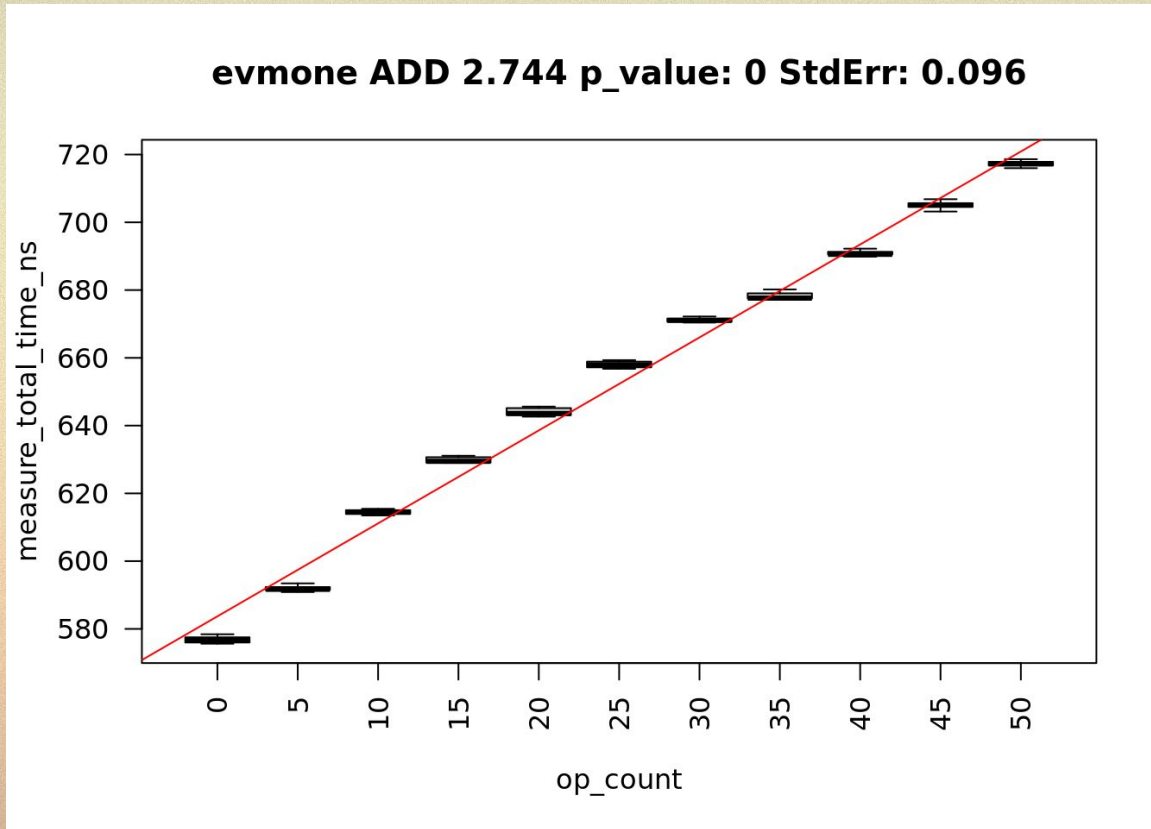

Intro bytecode	<b>ADD</b>		Cleanup bytecode
----------------	------------	--	------------------

Intro bytecode	<b>ADD</b>	<b>ADD</b>		Cleanup bytecode
----------------	------------	------------	--	------------------

Intro bytecode	<b>ADD</b>	<b>ADD</b>	<b>ADD</b>	...	<b>ADD</b>	<b>ADD</b>	Cleanup bytecode
----------------	------------	------------	------------	-----	------------	------------	------------------

# Single Measurement

# Client Results

evmone no outliers

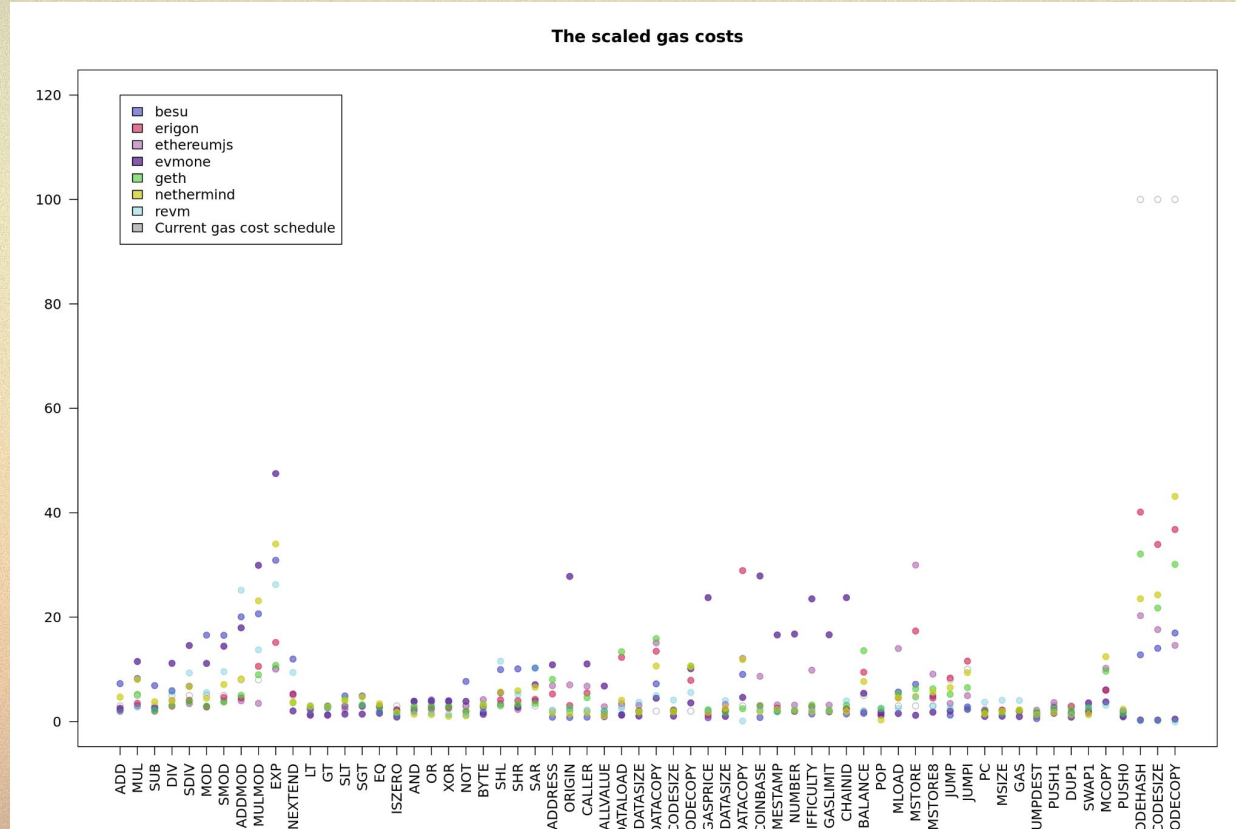

# All Clients

# Scaled Results

Part 2

# Proposal

# Conservative Update

OPCODE	Name	Current	Proposal
01	ADD	3	3
02	MUL	5	5
09	MULMOD	8	14
0A	EXP	static: 10 dynamic: 50 * exponent size	static: 10 dynamic: 20 * exponent size
60 - 7F	PUSHx	3	3
52	MSTORE	static: 3 dynamic: 3 * expanded memory	static: 3 dynamic: 3 * expanded memory
precompile 0x01	EcRecover	3000	12000

# Conservative Update

OPCODE	Name	Current	Proposal
01	ADD	3	3
02	MUL	5	5
09	MULMOD	8	14
0A	EXP	static: 10 dynamic: 50 * exponent size	static: 10 dynamic: 20 * exponent size
60 - 7F	PUSHx	3	3
52	MSTORE	static: 3 dynamic: 3 * expanded memory	static: 3 dynamic: 3 * expanded memory
precompile 0x01	EcRecover	3000	12000

# Radical Update

OPCODE	Name	Current	Proposal
01	ADD	3	1
02	MUL	5	1
09	MULMOD	8	4
0A	EXP	static: 10 dynamic: 50 * exponent size	static: 3 dynamic: 5 * exponent size
60 - 7F	PUSHx	3	1
52	MSTORE	static: 3 dynamic: 3 * expanded memory	static: 1 dynamic: 1 * expanded memory
precompile 0x01	EcRecover	3000	3000

## Conservative

- Minimizes the scope of changes
- Minimizes effect on the network
- Easier to implement

## Radical

- Reflects improvement in computational cost
- Widens the gap between computational and state changes costs
- Promotes data saving techniques
- Forces client configurability

The background is a light beige color with a large, faint diamond shape in the center. Inside the diamond is a stylized lotus flower. Surrounding the diamond are several stylized clouds in shades of orange and purple. In the top right and bottom left corners, there are small, stylized diamond shapes with lotus-like patterns inside.

**Thank you!**
