

Solarpunk vs Lunarpunk

The Evolution and Integration of these Movements

Manu Alzuru

Founder @ ETHBarcelona, Blockravers, Lovepunks

Timeline of the Punk Movement

Punk (Late 1960s – Mid-1970s)

Anti-establishment, challenging mainstream norms and societal expectations.

DIY ethic, valuing self-expression, personal responsibility, and direct action.

Cyberpunk (Early 1980s)

Sci-fi: Anti-authoritarianism and resistance, often through hacking, underground movements, or subversive action, where characters navigate corrupt systems to find freedom or meaning.

Steampunk (Late 1980s)

Craftsmanship, invention, and a DIY aesthetic, envisioning an alternate history where steam-powered machinery and Victorian-era aesthetics merge with futuristic ideas.

Timeline of the Punk Movement

Cypherpunk (Early 1990s)

Privacy, freedom through encryption, and digital autonomy.

Individuals should have the power to secure their data and communications.

Solarpunk (Mid 2010s)

Sustainability, community, and harmony with nature.

Hopeful future where humanity lives in harmony with nature, integrating renewable energy & sustainable technology into everyday life. It is a direct response to dystopian narratives, promoting positive, utopian ideals.

Lunarpunk (Early 2020s)

Mysticism, privacy, introspection, and balance between light and shadow

The movement emphasizes cryptography and privacy tools.

The Rise of Lunarpunk

The Rise of Lunarpunk

solarpunk hackers are creating transparent infrastructures for funding public goods.

The Rise of Lunarpunk

Lunarpunk has been forced to break away from the solarpunk legacy, and is now asserting its own.

...

the video is super dope, the only thing that I didn't like was the part that said that solarpunk systems are like a desert landscape where users are endangered and exposed.

...

I hope it is just a misconception of what it really means and that it isn't just to point fingers.

We need to work together!!!. What the elite wants is that we fight between ourselves.

...

the article is merely pointing out authoritarian tendencies within solarpunk and offering ways to correct them. in brief:

- * troubling obsession w transparency + identity systems
- * solar symbolism in general

...

Could you please point me to the things that you consider authoritarian within the solarpunk movement?

Do you think that we can achieve transparent systems for those that represent us while preserving the privacy of the people?

zeno @lunar_mining · Aug 10, 2022

...

- * proof of humanity
- * gitcoin

not interested in being represented by politicians. ppl should govern themselves. read Ocalan

you can have both but privacy must be the default, transparency the exception. ETH is backwards

I considered myself a solarpunk for a while because I'm an optimist.

This doesn't mean that I don't care about privacy. In fact, I care a lot about privacy since we need it for defending ourselves against authoritarians.

It's is true that many solarpunks want transparent systems and that the term has been co-opted by optimists that are not conscious of the potential risks of living in a complete transparent society.

For that reason and because I believe LOVE is the major energy in the universe, I have decided to stop labeling myself a solarpunk and now call myself a LOVEPUNK.
