

~180
developers
working on
core protocol.

## Lots of stuff for so few devs.

- Specification
- Execution Clients
- Consensus Clients
- Testing
- Research

## Still got a long way to go

"We could use one person, or ideally, one team for each of these boxes" ~ Tim Beiko

**Study Group** 

Stewarding Ethereum one new dev at a time.

## **Cohort 5 in numbers**

- 45 fellows
- 5 months
- 40 calls
- 2 events
- 30 projects
- 500 + updates

HEY! 👋 I'M raxhvi, WELCOME TO MY EPF5 ADVENTURE. SO FAR, OVER THE COURSE OF 113 days, I'VE INVESTED 902 hours INTO RESEARCH, CODING MARATHONS, BRAINSTORMING SESSIONS; WHILE CHUGGING 228 cups of coffee AND occasionally BANGING MY HEAD ON THE KEYBOARD. AS PART OF THE PROGRAM, I'VE HOPPED ON 29 calls, TRAVELED 10438 miles TO ATTEND 2 conferences AND WORKED ON 2 projects TO HELP NURTURE THE Infinite Gardes THROUGHOUT THIS WILD RIDE, I'VE DOCUMENTED MY MUSINGS IN 26 write-ups.

## **20 Presentations**

**EVM Memory Repricing** JSON-RPC Enhancement in Geth **IL-EVM** in Nethermind Samba, a Besu Portal Client Verkle Implementation in Reth C bindings for Constantine verkle-ipa **FOCIL** in Geth and Prysm Tracing Integration in Lighthouse **Light Client Support in Prysm** libp2p Implementation in Prysm ePBS in Prysm and Nimbus **Grandine on Windows Securing Grandine** PeerDAS in Grandine **PeerDAS Metrics** Ephemery Support in Teku/Besu **Shadow Network Simulations** Rated List SSZ Benchmarking & Optimization SSF Research
